

After earning her biochemistry degree from Florida State University, Dr. Elizabeth Vorhis completed her medical degree and radiology residency at the University of Florida. Early in her career, she was honored to serve on academic faculty at UF in the breast and abdominal imaging divisions.

Upon relocating to Asheville, North Carolina, Dr. Vorhis became an advocate for quality improvement initiatives, in particular, moving her practice from scored peer review to collaborative peer learning. Her current clinical focus is exclusively breast imaging, including promoting the value of contrast-enhanced mammography for screening and evaluating women with dense breast tissue.

Dr. Vorhis is a recent graduate of the Master of Health Care Delivery Science at Dartmouth, reflecting her commitment to improving individual and community health while reducing waste and harm. She and her husband Adam are excited to explore Colorado's peaks, watch their three children grow into adults, and occasionally relax with their three black lab mix dogs.

For more information about Advanced Medical Imaging Consultants' radiologists or services, please contact Andi Dresen, Client Services Manager, at 970-484-4757.
